- Microsoft Preferred Vendor for seven years consecutively (2005, 2006, 2007, 2008, 2009, 2010, 2011)
- Listed as fastest growing companies in Inc. 5000 for four years consecutively (2007, 2008, 2009 and 2010)
- One of the fastest growing companies in the Puget Sound region for the last six years (2005, 2006, 2007, 2008, 2009, 2010)

Experts in

Company Profile

Our team - talented, enthusiastic and driven - best defines us. We have a team of over 250 people who have outstanding computer science and business backgrounds and have worked for some of the best companies in the world.

As one of the leading solution provider in Washington state, MAQ Software has the expertise to ensure the success of your software projects, including:

- Former Microsoft developers and program managers who have extensive expertise in Microsoft technologies, development methodologies, test and code optimization
- Microsoft Certified Professionals, Computer Science and Engineering graduates from top universities in the US and India
- Fast paced, high maturity processes assessed at SEI CMMi Level 3
- Engineering centers in Redmond, Hyderabad and Mumbai

Engineering Team

Our talented engineering team has the skills to deliver outstanding solutions. Our staff has in-depth expertise in the following technologies:

- SharePoint 2010, .NET 4.0, C#, Business Intelligence, Windows Azure, Silverlight, XML Web Services, XML/XSLT, COM+ and related technologies
- Development Tools: Visual Studio 2010, SharePoint Designer 2010, Expression Blend
- Databases: Microsoft SQL Server 2008 R2, SQL Azure
- Server Applications: SharePoint 2010, Web Server, Exchange Server
- Operating Systems: Windows Server 2008 R2, Windows 7, Windows Mobile 7, iPhone, and Android

Our team undergoes rigorous technical training including development on wide range of cutting edge web technologies such as social media (Facebook and Twitter), Mobile platforms, Windows gadgets, Silverlight, Windows Azure, SharePoint and SQL Server 2008.

Recent Projects

Microsoft Corporation, Redmond

Search Incentive Browser Helper Object (SIBHO) is a "Browser Helper Object" based solution to detect, capture and log user search-counts. The BHO solution enabled Microsoft Bing team to successfully launch its loyalty program. The application was released for consumer and enterprise wide use. The 'Search Perks!' consumer solution attracted 250,000 users. The Search@Work Enterprise solution attracted several enterprise customers including a leading bank with over 100,000 employees.

OEM Business Insights is a Business Intelligence solution for Microsoft OEM Division. Using this application, sales and marketing managers analyze large amount of historical sales data downloaded from central databases. The application enables users to make decisions based on custom reports generated from integrated and analyzed data. OEM Division users analyze a granular distribution of sales summary data for key marketing investment decisions. The trend analysis reporting helps in decision making on forecasting and future plans. Role based security mechanism maintains confidentiality of the sales and financial data.

Windows Genuine Advantage (WGA) (<http://www.microsoft.com/genuine>) is a Microsoft initiative to showcase the value of genuine Microsoft Software. MAQ Software helped release the Genuine website in 181 countries and over 40 languages. MAQ Software teams participated in development, testing, security reviews, and performance analysis of the high volume and highly visible site. By March 2009, over 1 billion unique machines were validated by WGA.

Service Quality Assurance (SQA) Portal is an internal portal for Microsoft Service Business Desk (SBD) division. The portal is developed using SharePoint 2010 and is among the world's first few SharePoint 2010 intranet portals. The portal uses Silverlight Client Object Model to provide a rich and interactive user interface. The portal enables users to view the list of activities under a process specified for their role. The list of activities is picked from multiple SharePoint Lists and is rendered using Silverlight.

How to Tell (<http://www.HowToTell.com>) provides piracy related details to protect businesses and customers from counterfeiters, and help Microsoft to protect its intellectual property. MAQ Software redesigned How to Tell site to reach millions of users every month in 42 languages utilizing Microsoft.com infrastructure. We have modified and updated HTT site for the last five years to adhere to the latest web standards and keep the site updated with latest counterfeiting details.

Microsoft Store (<http://store.microsoft.com>) is an e-commerce website where customers can purchase Microsoft products, download software, order Finished Packaged Products (FPPs) and store product license keys online in their accounts. MAQ Software's one-click test automation solution saved 90% of test regression effort and helped find number of important improvements to the marketplace. MAQ Software built a modular architecture and automated key parts of user interface (download manager) and the backend processing to provide high reliability and comprehensive testing.

TrafficEdge (<http://www.EdgeQ.com>) is an innovative mobile application available on Windows Phone 7, iPhone, and Android. It provides easy to understand traffic images and traffic maps in real time so that drivers can steer clear of traffic congestion spots. With over 15,000 cameras covering the US, Canada and major cities worldwide, TrafficEdge adds new cameras as they become available. MAQ Software has over 150 applications available in app stores for Windows Phone 7, iPhone, and Android.
