DEPARTMENT EVENTS

A Seminar on “MACHINE LEARNING” Organized by IT department in co-ordination with Hack Hub on 16/09/2018.

Machine learning is a method of data analysis that automates analytical model building. It is a branch of artificial intelligence based on the idea that systems can learn from data, identify patterns and make decisions with minimal human intervention. The iterative aspect of machine learning is important because as models are exposed to new data, they are able to independently adapt.

An Orientation Program On “E-CELL” Organized by IT Department, On 15/09/2018

Entrepreneurship Cell(E-cells) is set up to foster entrepreneurship among the students. It is like a club, run by students and driven by the management of the institutes.

Students learn important & useful trait about entrepreneurship. Even though students do not take up entrepreneurship as a full-time profession, the skill sets learned as E-Cell members would be extremely helpful to them in any job.

E-Cells conduct several activities such as workshops, interaction with successful entrepreneurs, building prototypes, setting up small campus companies where other students can be your customers, internship opportunities with outside companies etc. in order to cultivate the below skill set among the students:

- 📌 Organizing skill

- ✚ Team building skill
- ✚ Sales & Marketing skill
- ✚ Convincing Skill
- ✚ Relationship building
- ✚ Knowledge about compliance
- ✚ Sponsorship

GOOGLE SKILLING INDIA Initiative Seminar Organized by IT Department On 08/08/2018.

Google has joined forces with India’s National Skill Development Corporation (NSDC) to to train young people in the development of Android apps.

As part of the partnership, which involves Developing Android Apps course, every participant will undergo 100 hours of training.

If successful, the training program will roll out an outsourcing industry which will offer to develop mobile apps, rather than software services, as reported by Nearshore Americas.

Peter Lubbers, head of Google Developer Training, said: “We believe India is uniquely placed to innovate and shape the internet experience of billions of users who are and will come online on the mobile platform.”

Google India launched an Android Skilling program in 2016 which was aimed at training two million developers in India over the next three years and in support of the Skill India initiative of the Indian government
