3 DAY WORKSHOP ON DISASTER MANAGEMENT

ORGANISED BY
THE DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

3 DAY WORKSHOP ON DISASTER MANAGEMENT

INSTITUTE - VISION

To be a centre of excellence in engineering and management education, research and application of knowledge to benefit society with blend of ethical values and global perception.

INSTITUTE - MISSION

1. To provide world class engineering education, encourage research and development.
2. To evolve innovative applications of technology and develop entrepreneurship.
3. To mould the students into socially responsible and capable leaders.

DEPARTMENT - VISION

To be a guiding force enabling multifarious applications in Electronics and Communications Engineering, promote innovative research in the latest technologies to meet societal needs

DEPARTMENT - MISSION

1. To provide and strengthen core competencies among the students through expert training and industry interaction.
 2. To promote advanced designing and modelling skills to sustain technical development and lifelong learning in ECE.
 3. To promote social responsibility and ethical values, within and outside the department.

3 DAY WORKSHOP ON DISASTER MANAGEMENT

About the Workshop

The ECE department of JBIET, in association with the National Disaster Response Force (NDRF) and Telangana State Disaster Response & Fire Services, is organising this disaster management workshop. This workshop will be of three days duration and will be held in JBIET. The workshop will be conducted by experts from the NDRF and SDRF, covering all aspects of disaster management, theoretical and practical hands-on sessions with Specific Disaster based Training such as Earthquake, Fire, Structural Collapse, Natural Disaster with special focus on Preparedness, Rescue methods & Recovery including first aid. BMC will also be providing first aid training to the participants.

Disasters can strike anytime, anywhere. They can occur with little or no warning, and can have devastating consequences. That's why it's so important for everyone to be prepared. A disaster can be a natural disaster, like a hurricane, tornado, or earthquake, or it can be a man-made disaster, like a fire, chemical spill, or terrorist attack. No matter what type of disaster, it can disrupt your life and the lives of those around you. That's why it's important to have a plan in place so you know what to do in the event of a disaster. A disaster management plan can help you and your family stay safe and make it through a disaster. A disaster management plan includes information on what to do in the event of a specific type of disaster, like a fire or tornado. It also includes information on what to do if you are forced to evacuate your home, where to go, and what to take with you. Creating a disaster management plan is a vital part of being prepared for a disaster. But it's not the only thing you can do to be prepared. You should also take some time to learn about the different types of disasters

3 DAY WORKSHOP ON DISASTER MANAGEMENT

About the Speakers
