

REPORT ON ECO FRIENDLY SEED GANESH CHATURTHI CELEBRATION, 09th SEPTEMBER 2021

Taking eco-friendly Ganesh idols a step forward, Student Activity Center-JBIET have made plant-germinating Ganesh idols by filling plant seeds in the stomach on 09th September 2021.

“As and when the idol is immersed in water or disposed of in the open, there are many chances of these seeds growing into plants and extending the green cover,” said Dr.P.C.Krishnamachary, Principal, JBIET.

“With growing environmental pollution, it is the need of the hour to grow many trees, plant saplings and nurture them every minute. We are also planning to identify plants with great medicinal and therapeutic values and these Ganesh idols will soon have those seeds as well. We will be continuing this initiative annually during Vinayaka Chavithi and I urge all of you to be a part of it,” said Dr.J.Kartigeyan, Dean Student Affairs.

“We have not used any special clay, but collected soil from neighbouring paddy fields to prepare these eco-friendly idols without adding any chemical substances,” Mr.Lakkarsu Krishna, SAC coordinator and students said.

DEANS, HoDs, SAC Coordinator, NSS Coordinator, Physical Director, Teaching, Non-Teaching staff and NSS Volunteers were present during the programme.
